

# AURUM FORT

A FINISHED CLUB HOUSE ON  
THE MOUNTAIN SLOPES OF  
GONIO

# Zaza Gogichaishvili

## founder of Aurum Fort

The company's founder is an entrepreneur with over 15 years of experience in establishing and developing successful projects across the tourism, construction, and real estate sectors. In 2008, he founded a travel company that secured a strong market position thanks to its high level of service, professional team, and commitment to quality.

Expanding his activities in the construction sector, he became the owner of a company supplying building materials and plumbing equipment from Spain, a venture that fostered a deep understanding of European quality standards and modern technologies. Over 20 years of martial arts training shaped his core principles: discipline, composure, responsibility, and a commitment to continuous self-improvement.

Today, accumulated experience and knowledge are being channeled into the creation of modern living spaces that combine European quality, reliability, and technology with comfort for future residents.

*Aurum Fort was conceived as a space where a blend of well-planned infrastructure and the natural environment allows for daily connection with nature.*

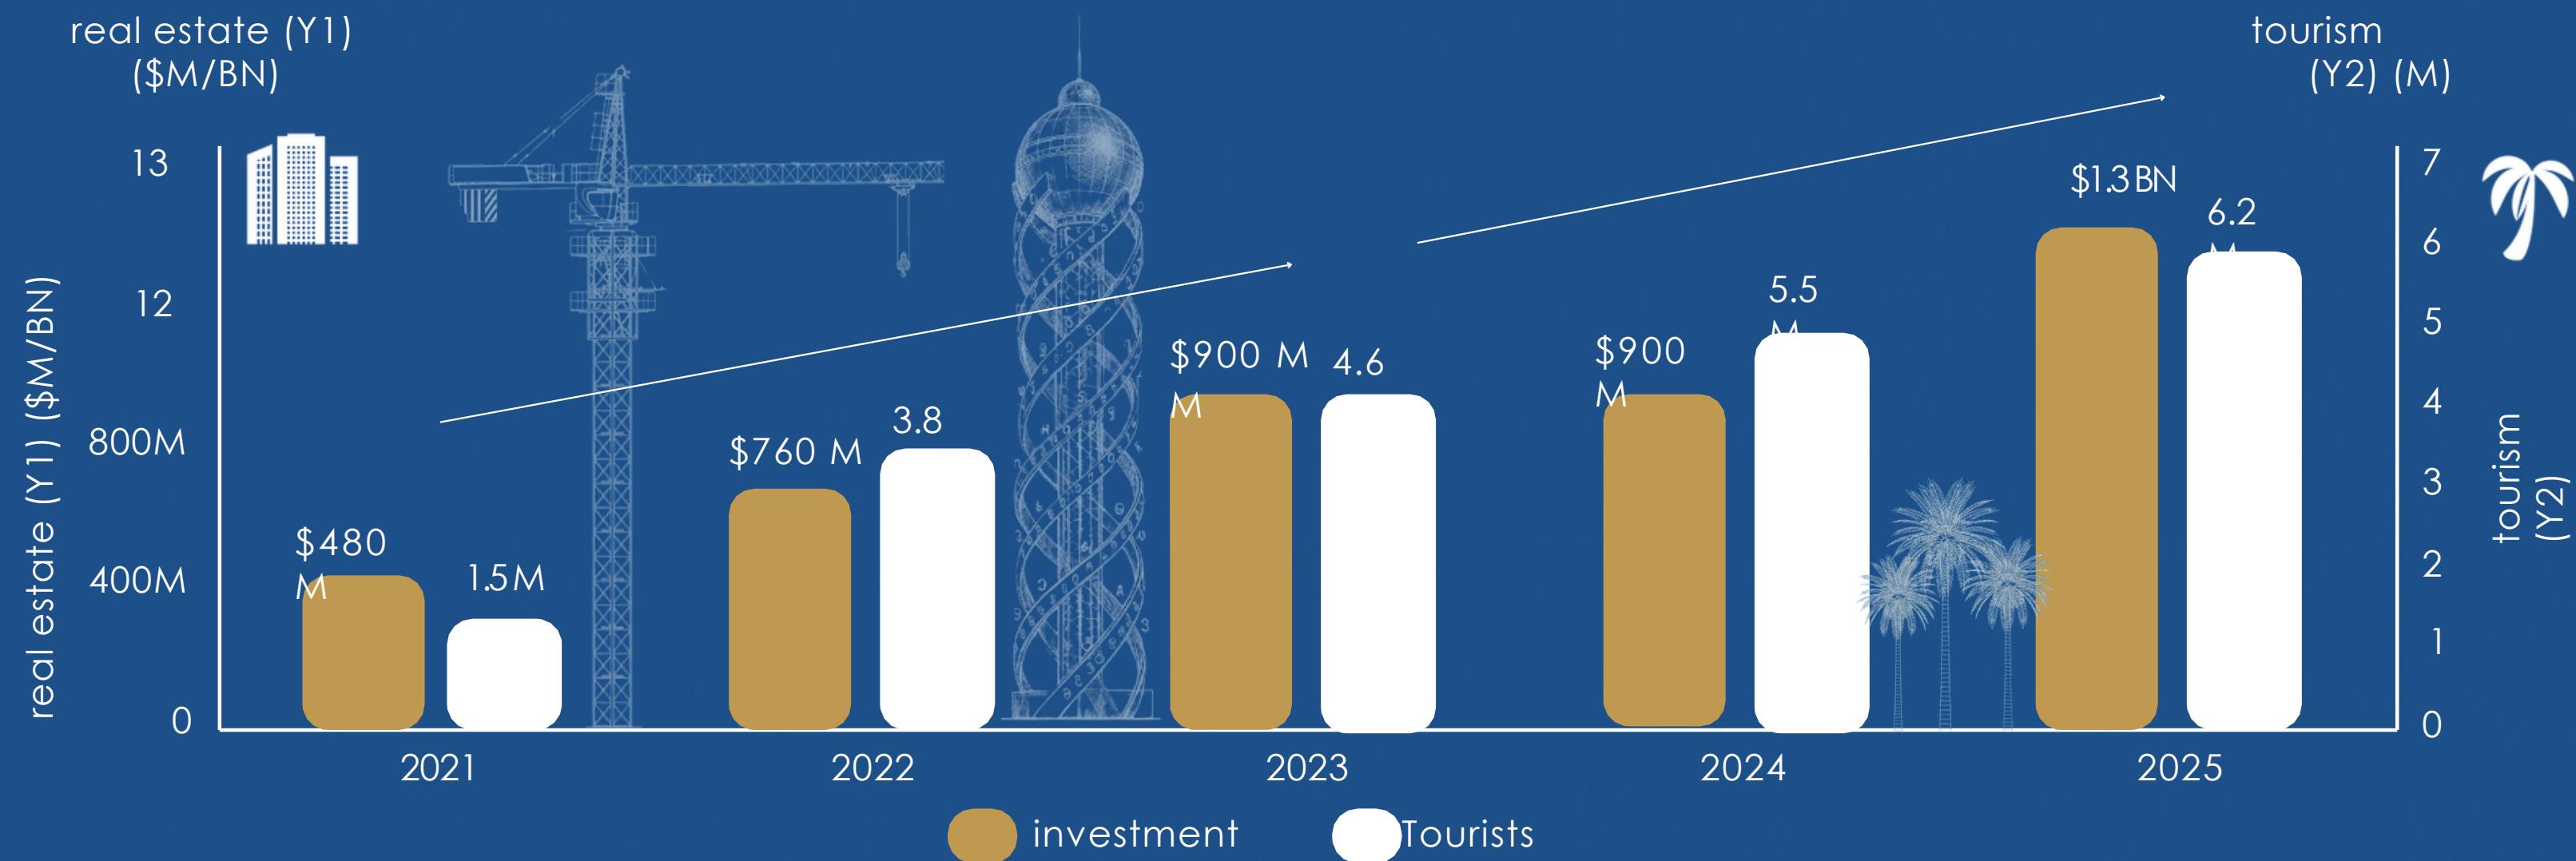

*All of Aurum Fort's wellness initiatives are designed to host signature retreats and comprehensive rejuvenation programs amidst the mountains, the sea, and the natural landscape.*

*A distinctive feature of Aurum Fort is the personal involvement of the developer himself. Aurum Fort is being created not only for future residents but also as a place where the developer chooses to live himself.*

# GROWTH IN REAL ESTATE AND TOURISM

Investment dynamics in Batumi real estate and tourist flow to Adjara

over 5 years

Sources: Galt & Taggart, TBC Capital, GNTA.

# ECONOMICS WITHOUT BARRIERS

An aerial photograph of Batumi, Georgia, showing the city skyline, the Black Sea, and the Caucasus Mountains in the background. The city is densely packed with buildings, and the sea is a deep blue. The mountains are visible in the distance under a clear sky.

Over the past 5 years,  
annual real estate  
investment in Batumi has  
nearly tripled,  
while tourist arrivals in the  
region have grown fourfold.

This is the result of a  
unique tax environment.

**Property tax: 0%**

**Capital and ownership:**

Unrestricted transfer of funds  
and state protection of private  
property.

**Residence permit:** Eligibility  
for a residence permit upon  
purchasing property

# GONIO: an oasis of private retreat

Crystal-clear

Water clarity up to 4 meters

Healing mountain-sea breeze:

145 meters above sea level: the elevation fully shields  
you from coastal noise

THE CLUB HOUSE

# ASSET GROWTH OUTLOOK

01.

## Marina by EagHills:

The world's largest developer is launching a deep-water yacht marina and premium promenade in Gonio. The project fully redefines the coastline's status, turning it into a world-class point of attraction

02.

## Bypass tunnel:

Complete removal of transit traffic from the resort zone.  
The location will become pedestrian, quiet and pristine, triggering the final wave of capital appreciation for completed residences

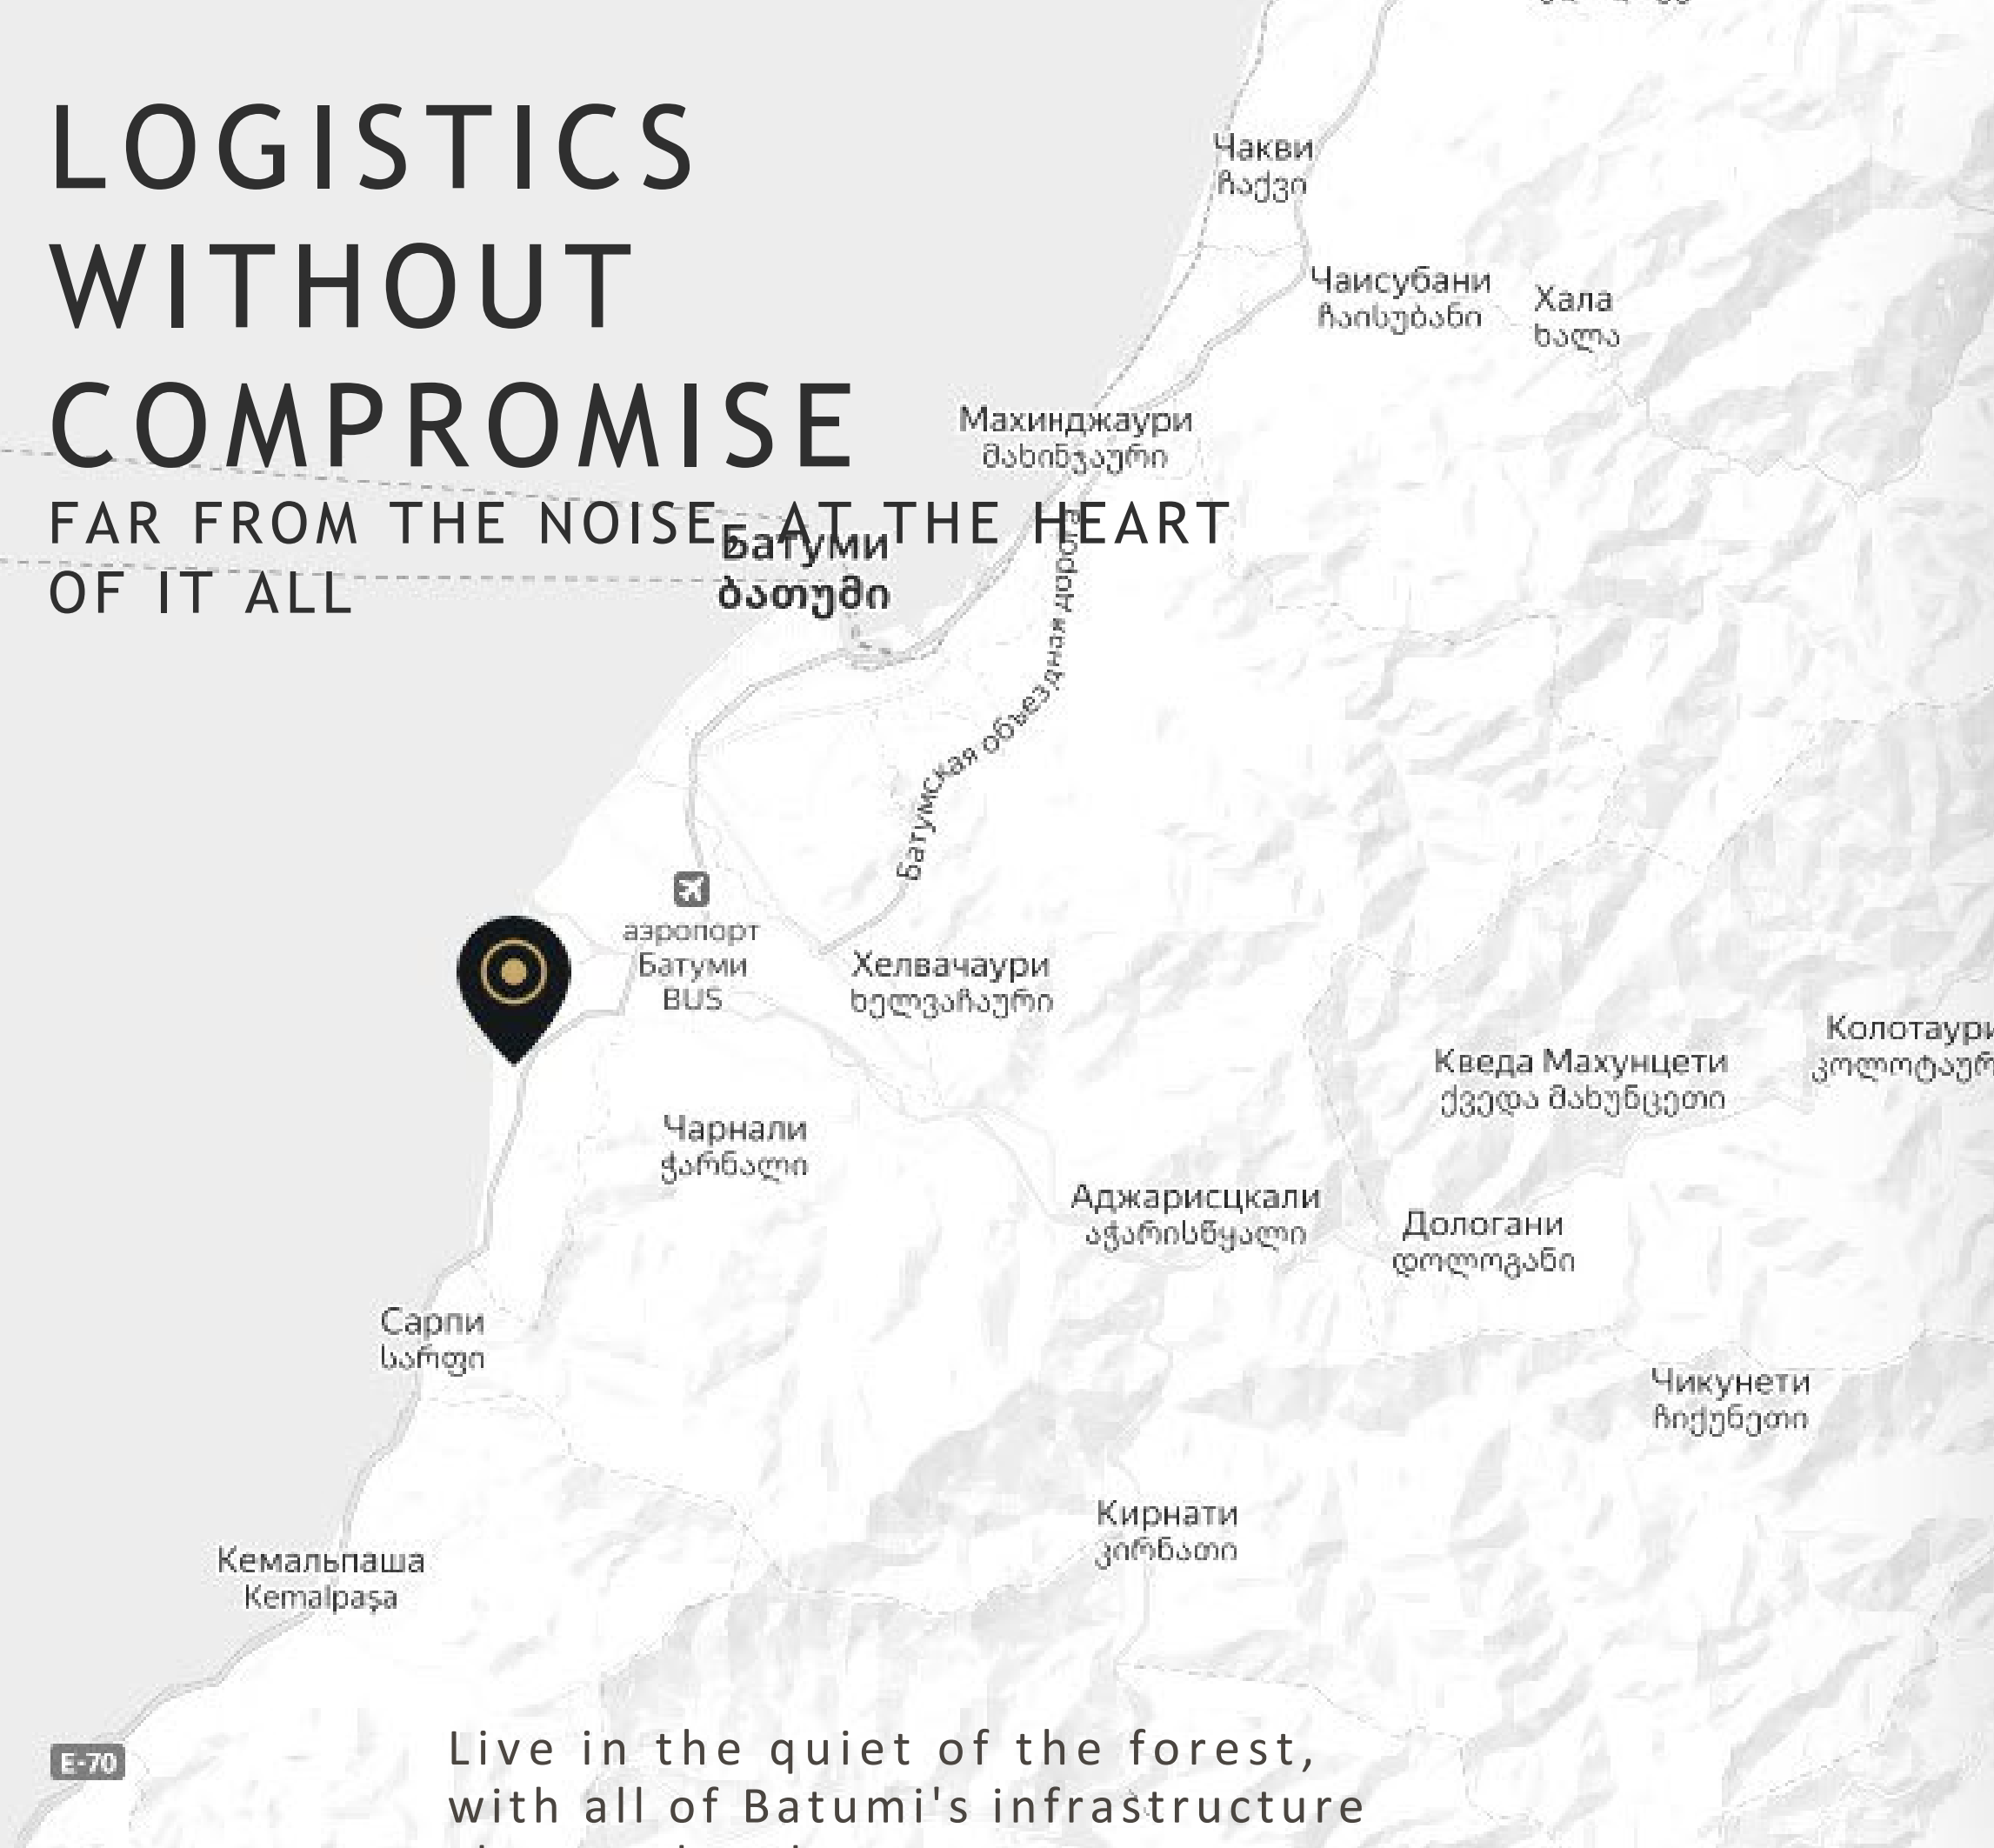

03.

## Aurum position: Port's

The club house sits on a mountain slope, elevated above it all. You are fully shielded from the noise, bustle, and traffic of the future waterfront, while all of its luxury infrastructure and restaurants remain within walking distance

# LOGISTICS WITHOUT COMPROMISE

FAR FROM THE NOISE, AT THE HEART  
OF IT ALL

Live in the quiet of the forest,  
with all of Batumi's infrastructure  
close at hand

# DECONSTRUCTIVIST ARCHITECTURE

# ZURAB ARABIDZE

founder of *Arabidze Architects*

His work has been shown at the Tretyakov Gallery and at Christie's auction house.

Deconstructivism integrated into the landscape. The building's form does not contest the mountain, but echoes its tectonics.

Every facet of the facade serves a purpose: shielding residents from the sun while preserving their 180° panorama

# GEOMETRY BEYOND CONVENTION

The building rejects right angles. Its facade is composed of asymmetric polygons, creating the effect of a tectonic shift.

The building was **fully constructed** in 2022 and has passed through its natural settling period. Structural and deformation risks are eliminated.

The property is officially registered as a **residential building**, not commercial apartments. This guarantees minimal rates for utilities. Minimal tax on the sale of a residential unit, higher for apartments

# MARKET LOGIC

## 01. SCARCITY FACTOR

The Batumi market is oversaturated with faceless high-rise "anthills." A low-rise club house in Gonio is the rarest and most sought-after asset on the coast.

## 02. INFLATION PROTECTION

Collectible real estate appreciates faster than the market.  
Unique architecture, autonomous engineering and hotel-grade service of the premium class protect your investment from inflation.

# PRIVATE VIEWING

No render can capture the silence of a centuries-old walnut grove, the grandeur of the mountain slope, or the purity of Gonio's air.
